Instruction Sheet

Thank you for purchasing your **BigStuff BT Lithium-Ion Bluetooth RS232 Adapter** from EFI Analytics. This Adapter has been preconfigured with the proper settings and tested for simple communication with your BigStuff3 controller.

To use, you must first pair your PC or Android based Phone or tablet with this Adapter.
On Android, go into Bluetooth Settings, and Scan for Devices

From a PC you must have built in Bluetooth support or a USB Bluetooth dongle. Select Add Device from Device Manager.

- Connect and Power the Adapter by turning on switch 8, you will then see a rapid flashing blue light
- Select BigStuffXX
- Enter the Pairing PIN

Note: When you pair with this device you will be prompted for a PIN, use 1234
